President's Letter

I would like to take a moment to thank all of our customers for their continued loyalty and support. They have made HCS the success that it is, and we remain committed to serving them for many years to come.

I would also like to welcome a new member to the HCS family of customers, Oceans Healthcare, LLC, of Lake Charles, Louisiana. Oceans Healthcare is dedicated to the development and management of behavioral health services in the southern United States. We look forward to many years of serving their healthcare information system needs and hope you enjoy reading more about them on page two of our newsletter.

Also, as you have probably already noticed, we have updated and modernized our INTERACTING newsletter to better serve our readership. We hope that the new color and layout has made it more visually interesting and easier to read! We appreciate your continued feedback and please feel free to forward any comments or suggestions.

Wishing you a happy and healthy 2007,

Joseph J. Fahey
Chief Executive Officer

NEW!

General Ledger Report Writer Enhancement

HCS would like to announce a new enhancement to our INTERACTANT General Ledger Report Writer. In addition to having the ability to produce a hard copy report, the system can also create an Excel version for easy review, edit, and email. The new and well-formatted Excel file is color-coded to enhance readability, can be saved for later retrieval or deletion, and provides all the functionality available in Excel including creating charts, pivot tables, etc.

For information about this new INTERACTANT enhancement, please contact your Account Manager today.

NEWS

HCS to Provide Fully Integrated Software Solutions to Oceans Healthcare

HCS is pleased to announce its recent contract award with Oceans Healthcare, LLC, Lake Charles, LA. HCS will be implementing INTERACTANT Clinical and Financial applications to Oceans' Behavioral Hospitals throughout Louisiana.

With its functionality and flexibility, INTERACTANT will improve efficiencies and manage business processes for Oceans Healthcare's six facilities. With applications that include registration, billing, general ledger, medical records, order entry and clinical care documentation, Oceans Healthcare gains a powerful enterprise information system that streamlines patient management, census reporting, clinical operations and billing processes.

"Oceans Healthcare chose INTERACTANT for its ability to function well in multi-site facilities," states Jason Reed, CEO of Oceans Healthcare. "With INTERACTANT's fully integrated applications, we look forward to experiencing the benefits of having real-time access to information for critical decision-making and overall better quality of care."

"With INTERACTANT Applications, Oceans Healthcare will experience improved communications resulting in a positive impact on the entire organization," states Tom Fahey, Vice President of Sales and Marketing for HCS. "Less paperwork, a more streamlined workflow, and application support provided by an experienced and stable technology partner allows staff to remain focused on quality patient care."

Newly Designed Electronic Medication Administration Record (E-MAR)

The INTERACTANT E-MAR Application was enhanced to ease the process of electronic documentation for medication administration. The new look and feel of the E-MAR allows the user to see all medications due for assigned residents within the user's defined time frame. The user has the ability to sort the medications for each resident by drug type, including viewing only pain medications, insulin, and/or anticoagulants. Additional sorting functions allow the user to view all residents that were administered PRN medications where the effectiveness has not

been charted. The new E-MAR also has detailed medication education information which is viewable and can be printed to facilitate family/resident medication education.

The E-MAR is tightly integrated with all INTERACTANT Applications to reduce redundant data entry. For example, if a vital sign is entered in the E-MAR, it flows to the vital sign file where trending and graphing is available. This new functionality compliments existing functionality including medication omission reports which aid in safe medication administration and compliance.

New CTO Appointed

HCS, a NJ-based developer of integrated clinical and financial software solutions for the healthcare industry, announced that it has appointed Darren Yonkin as its first chief technology officer. As CTO, Yonkin will oversee the continuing research and development of HCS products, technology, and technical initiatives for use by healthcare providers including long-term care, behavioral health, rehabilitation, and acute care facilities. An experienced programmer with a proven track record for innovation, Yonkin will also lead the company's initiative by directing research and development projects, aligning software strategy with ongoing governmental regulatory requirements, customer service and management, and continue to provide strategic leadership for HCS.

"We are very pleased to announce this well-deserved appointment of Darren, a highly

regarded and respected member of the HCS team," said Joseph J. Fahey, Chief Executive Officer of HCS. "Throughout his tenure, Darren has played a key role in establishing HCS as an industry leader in providing healthcare software solutions, and this position will present further opportunities for his vision for growth."

Yonkin brings more than 17 years of experience to this new role of CTO. With a degree in Mathematical Computer Science from Lock Haven University, PA, his career at HCS started as account manager. With determination and innovation, Yonkin was promoted to project manager, vice president, senior vice president, and to CTO. Having a CTO on board with the vision and the experience to continue to meet market demand is important for HCS and its customers.

It's getting closer all the time – nationwide adoption of the Electronic Health Record.

Now look around... if you find an organization that's not concerned, they are probably using INTERACTANT™, the fully integrated Clinical and Financial System from HCS. INTERACTANT users experience real-time access to clinical information across multiple care settings, resulting in streamlined clinical and business operations.

How Prepared Are You?

With over 37 years of experience in providing healthcare information systems, HCS is the right partner to prepare and transition your organization to a fully electronic medical record, an initial step to the EHR. Our broad base of integrated applications and industry-leading technology will give you confidence in knowing that you will be ready.

INTERACTANT™

Fully Integrated Clinical And Financial Information System

"The technical support we have received from HCS has been effective, efficient, and timely. When asked to recommend an IT vendor, we highly recommend HCS."
